

QUANTUM INDUSTRY DAY in SWITZERLAND

2021

The 2021 edition of **QIDiS** will be take place **virtually**

- **October 5** : Presentations via Zoom
- **October 6**: [Face-2-Face / Speed Dating](#) through the B2match website.

Check the [Programme](#).

The programme covers the areas of quantum computing, quantum sensing, quantum instrumentation and quantum communication.

QUANTUM INDUSTRY DAY in SWITZERLAND 2021

WHY PARTICIPATING

- Hear state of the art keynote talks in the fields of quantum computing, sensing and quantum-safe communication. Speakers are mostly from the private sectors or researchers very close to the product development
- Interact with a rich ecosystem of companies as well as research institutes actively developing products, technologies and services leveraging quantum effects.
- Advertise your own products, services or company through the marketplace
- Meet potential partners for technological, commercial or collaborative research projects

AUDIENCE

- Private companies creating products or services based on quantum-based phenomena in the field of quantum computing, quantum sensing or quantum-safe communication
- Private companies providing enabling technologies (materials, nanotechnology, vacuum, low temperature electronics, connectors etc.)
- Researchers with a strong interest in application into products or services
- Investors
